

1st GOLD AWARD

FLIP! CHALLENGE 2006

Designed by:
Qi Shizhi (Chinese)
He Yifang (Chinese)

MOOOOOO

The brown patches design replicated the hide of a cow. Breastfeeding has sometimes been teasingly related to milking a cow. This adds a touch of humour which is necessary to ease the social stigma surrounding breastfeeding and to raise the positive profile of the practice.

Mooo is not designed only for mothers but is also meant for men and women of all ages. At the same time, **Mooo** can be an imaginative and fun chair for the children, a chic and modern piece to enhance the personality of a space or simply be a rocking chair for the elderly.

WING CHAIR

The **Wing Chair** is an adaptable furniture that could be easily transformed into various forms with interesting functions. It can be a two seater chair just like a patulous wing or an interlaced seat for two people and can even become a chaise lounge. It can be easily fabricated and has great flexibility support to accommodate different genres of people.

The selected materials used to make the **Wing Chair** bring forth the sleek and simple look. The milky-white seat cover with a soft-patterned fabric and supported by stainless steel boasts simplicity with character. The design soars...like wings do.

3rd BRONZE AWARD
